

## Impact of GST on Pure Service Industry

The Goods and Services Tax (GST) – the biggest tax reform attempted by India – is now just a step away from its realisation.

Industry would now need to analyse the provisions of the draft law in detail, and assess its impact on their business. This is essential to ensure that timely representations are made to the Government, as well as to identify key implementation requirements as part of the preparations for transition from the existing indirect tax regime to the GST regime.

***“Out of clutters, find simplicity!” Albert Einstein once said. So join us in our attempt to decipher the ambiguous law into a clearer and a unambiguous law..!!***
